Fonts

- Testing
  - Regression was major issue during different Open Type layout shaper in ICU, Pango and KDE.
    - Harfbuzz helped
  - Complex script
    - Still regression chances during fixes.
  - Testing
    - Manual testing not sufficient
  - Automated testing
   - More and more test cases.

fedora

Present State

- UTRRS
  - But not package level and run time.
  - Manual
    - Image comparison possible but manual hooking.
- Package level testing
  - Lohit fonts has it, we can extend it for other default packages.

fedora

Taks

- Identify packages and implement automated testing for it.

Organizing community

- Transperancey (All public communication)

- Dont try to complete everything, keep few things open

- Regular meeting, Meeting to discuss task and keep strategy for mailing list.

  - "Sometimes communicating about what's being done is more important than doing more.

  - Quiet projects stay quiet. Noisy projects get noisier.

- Tasks, tasks, tasks or 'Project management matters

  - Too empty is scary. Too full makes it look too late to help. Balance your task list, have at least 60% of your tasks assigned.

- Governance that is good enough to get going
